

NORTH CAROLINA
DEPARTMENT OF
TRANSPORTATION

**STATE
TRANSPORTATION
IMPROVEMENT
PROGRAM**

2009–2015

JUNE 2008

Dear Friends:

High-quality transportation is vital to the growth, development and ongoing success of North Carolina. It plays an essential role in connecting citizens to important education, health care and business opportunities. It provides the support network our businesses need to grow and thrive. And most importantly, it helps make North Carolina an ideal place to live, work and visit.

The N.C. Department of Transportation's mission is to connect people and places in North Carolina — safely and efficiently, with accountability and environmental sensitivity. To fulfill this goal and meet the state's growing travel demands, we have developed a State Transportation Improvement Program (STIP) that makes our infrastructure safer, more efficient and more reliable.

The 2009–2015 STIP funds 2,437 transportation projects totaling about \$13 billion, including funding for the state's highway, public transportation, aviation and Governor's Highway Safety programs. It focuses not only on new construction, but also the maintenance and safety of our existing infrastructure. The document is fiscally sound and balanced according to the equity formula mandated by the state's Highway Trust Fund law. The document includes both "deliverable" and "developmental" components to help stakeholders better gauge funding for various projects.

Projects also reflect the voices of citizens. NCDOT works extensively with local metropolitan and rural planning organizations across the state to develop priorities and ensure that the diverse needs of our people are being met. We also held a series of public meetings across North Carolina to gain public input and provide citizens an opportunity to comment on the draft document and suggest changes. This input was taken into account as this STIP was developed.

As we continue to move forward in the 21st century, transportation will become increasingly important in maintaining a high quality of life for our state. Known historically as "The Good Roads State," North Carolina is now striving to be a leader in all modes of transportation, providing a seamless infrastructure that gives our citizens multiple viable alternatives to meet their travel needs. The development of the 2009–2015 STIP is an important step toward fulfilling that goal and ensuring that all of North Carolina — from its urban centers to its rural communities — continues to have an active voice in making transportation decisions and helping build a promising future for our state.

Sincerely,

A handwritten signature in black ink, appearing to read "Lyndo Tippet", is written over a light blue horizontal line.

Note: STIP Reading Guide and Funding Source Key for Highway and Public Transportation Programs shown on back of each Division Map and Statewide Fly Sheet

ORGANIZATION OF THE STIP

The State Transportation Improvement Program (STIP) contains funding information and schedules for transportation divisions including: Highways, Aviation, Enhancements, Public Transportation, Rail, Bicycle and Pedestrians, and the Governor's Highway Safety Program. A separate summary of funding of major highway projects is available as a companion document to the STIP.

The transportation program in the STIP is organized by highway divisions. At the beginning of each of the 14 divisions, a map is provided with a color-coded key to the major highway funded projects in that division. Projects are listed by county within each division. This results in some duplication since highway projects frequently extend across county and division lines. When this duplication occurs, a project is listed in each county in which it is found.

Specific projects in each county are listed under Highway and Public Transportation Programs. The Highway Program projects are subdivided by category: interstate, rural, urban, federal bridge, municipal bridge, mitigation, bicycle and pedestrian, congestion mitigation, enhancement, ferry, hazard elimination, safe routes to school, passenger rail and roadside environmental. Interstate, rural, federal bridge and ferry projects are listed in order of route number. Urban, municipal bridge and bike and pedestrian projects are listed by city or county and enhancement projects are listed by city while mitigation projects are listed by county. Congestion mitigation, passenger rail projects are listed alphabetically by city or county. Hazard elimination projects may be listed by route, city or county.

GARVEE (Federal Revenue Bonds) Projects are designated as such in the project's comment field. The Aviation Program consists of State-Aid to Airports and Block Grants. Projects are listed alphabetically by county and subdivided under commercial Services and General Aviation Airports. The Public Transportation Program list projects first by county, secondly alphabetically by city and then by planning authorities or other agencies. The Governor's Highway Safety project list is comprised of various safety programs.

In the Highway Program projects in the Intrastate or Urban Loop System are listed under the appropriate funding program, but are identified with an asterisk (*) following the project I.D. number. North Carolina's Strategic Highway Corridor projects are designated by comment under the work type-funding source columns. Ferry projects are also part of the highway program and have been assigned to their respective connecting highway route numbers where possible and the division where they are assigned to operate.

The fiscal year scheduled for planning and design are shown as FY. The type or phase of work is shown for each interstate, rural and urban project in the county-by-county listing. Right of way and construction phases of each project are shown as FFY (Federal) or SFY (State). The F or S designation is dependent upon the type of funding to be used for that particular phase of work. The cost of right of way and construction and their anticipated funding sources also are listed.

The Secondary Roads Program (County Construction) is not included in this statewide highway improvement program. NCDOT and the respective county boards of commissioners develop this program annually. Similarly, the Small Urban Program is developed annually by the department and municipal officials and is excluded from this statewide transportation improvement program.

A separate map book is available that includes general maps showing a **corridor** for each of the funded projects in the interstate, rural, urban and bridge programs. The descriptions and maps for most projects are preliminary and subject to change. All major projects require extensive planning, environmental impact and design studies. **The location and exact type of improvements are subject to refinement and modification during the planning and design phases.**

The State Transportation Improvement Program is available on-line at www.ncdot.org/~tip

Transportation

The State Transportation Program

The highway construction budget consists of the Federal Aid Construction Program and the Intrastate and Urban Loop Programs from the North Carolina Highway Trust Fund. Combined funding is expected to be \$1579.1 million for Federal Fiscal Year (FFY) 2009. Planning and design is budgeted at \$162.9 million, leaving \$1416.2 million for right-of-way and construction. During the seven-year State Transportation Improvement Program (STIP), \$10.9 billion is expected to be available for the STIP right-of-way and construction.

The Federal Aid Construction Program consists of many funding categories. Funding in most of these individual categories is subject to overall federal budget constraints and Federal Obligation Limitation. This effectively limits the amount of federal funds that can be utilized in any one year. In the recent past, in order to comply with overall federal budget constraints, USDOT has taken back or rescinded previously apportioned budget. While these rescissions have had minimal impact on our

program to date, continued use of this budget mechanism could adversely affect future budgets.

Although North Carolina's total apportionment of federal funds for FFY 2009 is expected to be about \$958.4 million, it is anticipated that the obligation limitation applied to most federal aid categories will be about \$817.4 million. Funds for other federal aid categories not subject to this obligation limit bring the total federal funds expected to be available in FFY 2009 to \$942.3 million.

The amount of state matching funds needed for the Federal Aid Program is expected to be \$235.7 million, which will be funded by the State Highway Trust Fund. When federal funds are used on a Trust Fund eligible project, the Trust Fund law allows an amount equal to those federal funds to be used to fund state STIP construction projects, which allows the Department to have a small annual state construction program.

The 1989 General Assembly created the North Carolina Highway Trust Fund to accomplish the following goals:

- complete a 3,600-mile intrastate system of four-lane roads;
- widen and improve 113 miles of existing interstate highways;
- build multi-lane loops and connectors near seven major cities (which was expanded to ten)
- provide additional funds in order to pave all unpaved secondary roads by 2006 (SFY 2010-11 funds may be used for modernization)
- provide additional funds for municipal streets

Revenues for the Trust Fund are generated from the state motor fuels tax, the 3 percent use tax on the sale of motor vehicles, DMV titles and other fees, and interest income.

The Trust Fund Law specifies that a designated amount will be transferred each year from the Trust Fund to the General Fund. Also, an inflationary adjustment was added to the \$170 million base transfer. House Bill 1473 passed by the General Assembly in 2007 reduced this transfer 50% effective 2009, an additional 50% in 2011, and eliminated it completely by 2013. Approximately one half of Trust Fund revenues generated from title and other fees is allocated to the paving of secondary roads. A maximum of 4.2 percent of the remaining Trust Fund revenues may be used for administration of the Trust Fund Program and the NC Turnpike Authority. The balance of revenues is distributed as follows:

- 61.95 percent to the Intrastate System;
- 25.05 percent to Urban Loops;
- 6.5 percent to pave Secondary Roads;
- 6.5 percent to Municipal Street Aid Program (the Powell Bill program)

The State Transportation Program (continued)

This STIP budget is based on the certified budget and projections developed by NCDOT and the Office of State Budget and Management in the summer of 2007. These estimates were used to develop the draft program and are the basis for air quality and fiscal constraint tests. The Trust Fund revenues available for all programs are projected to be about \$1 billion for FY 2009 and \$7.9 billion during the seven-year period. Of this \$7.9 billion in revenue, \$5.8 billion is allocated to the Intrastate and Urban Loop STIP programs. The remainder is utilized for non-STIP purposes. The existing federal bill (SAFETEA-LU) expires September 30, 2009. Estimates of federal funds beyond that date are conservative, but may change greatly both in amount and program structure as Congress works to pass a new Federal Surface Transportation Bill.

Inflation has not been factored into the above revenue estimates. However, when programming projects in the STIP the following inflation factors for future construction and right of way cost increases were used to reserve the budget at an overall inflation rate of 5%. Project costs and revenue projections shown in this planning document budget are in constant 2008 dollars. Therefore, to find the true anticipated future year project costs, multiply the 2008 cost shown in the STIP by the following inflation factors: 2009 - 1.025, 2010 - 1.076, 2011 - 1.130, 2012 - 1.187, 2013 - 1.246, 2014 - 1.308, and 2015 - 1.374.

In 2005, House Bill 254 authorized NCDOT to issue Grant Anticipation Revenue Vehicles (GARVEE bonds) to finance federal aid highway projects. All funds derived from GARVEE bonds are backed by the receipt of future federal funds and no state funds may be committed to the debt service. In October 2007, the Department received \$287.6 million in GARVEE bond proceeds. It is anticipated that an additional \$548 million in bonds will be sold as shown programmed in this seven year STIP.

Accomplishments – Federal Fiscal Year 2007

Projects with activity(s) scheduled during Federal Fiscal Year 2007 are listed in the **Accomplishments Table** on the following pages.

Projects for which the indicated activity did occur are shown with a **“Yes”** in the **Work Started** column. Projects where the scheduled activity did not occur are shown with a **“No”** in the **Work Started** column.

The Remarks column gives a brief explanation of the programmed activity.

IDENTIFICATION NUMBER		FUNDING See Highway or Public Transportation Funding Key for an explanation of funding categories designated for each project phase.											
Assigned to each project at conception and remains with project until completion.													

WORK TYPE (ACTIVITY)
Phases of implementation:
preliminary engineering,
right of way, mitigation,
utilities or construction.
For **Other Work Types** or
Activities see **Work Type**
(Activity) box below.

ESTIMATED COST Preliminary engineering,
right of way, utilities, mitigation and construction
cost estimates by funding category in current
dollars. Cost may include one or more funding
types. Multi-year funding of a project segment
indicates **Cash-Flow Funding** with proposed
work type or activity beginning in the initial
scheduled year.

GHSP

GHSP

The Governor's Highway Safety Program

The Governor's Highway Safety Program (GHSP) was created in 1967 by legislation which empowered the Governor to contract with the U.S. Department of Transportation for the purpose of securing funding through the Highway Safety Act of 1966, Section 402. This funding provides for the administration of a highway safety program designed to reduce traffic crashes and the resulting deaths, injuries and property damage.

Today, the GHSP is under the supervision, guidance and support of the Secretary of Transportation. Funding for the GHSP projects and activities is provided through federal traffic safety grants.

The nine major areas of funding are occupant protection, police traffic services, speed control, traffic records, emergency medical services, motorcycles, pedestrians/bicycles, roadside safety and prevention of alcohol/drug-related crashes.

The GHSP consists of 12 staff positions representing planning, programming, evaluation, fiscal management, public information and education. The GHSP's mission is to plan and execute a comprehensive highway traffic safety program for North Carolina to reduce the number of fatalities and injuries on the state's roadways.

The GHSP developed a statewide safety belt campaign that utilizes enhanced law enforcement and public education to increase statewide safety belt usage rates. This campaign, "Click It or Ticket", has become a national model and is now utilized in over 40 states. North Carolina now boasts an 88.8 percent safety belt usage rate and "Click It or Ticket" has been responsible for a 14 percent decline in fatalities and serious injuries and a savings of more than \$150 million in health care costs, not including costs associated with loss of productivity.

A companion campaign to address impaired driving, Booze It & Lose It" was developed shortly after "Click It or Ticket" was launched in 1993. The "Booze It & Lose It" campaign, through the implementation of high profile checkpoints utilizing the state's six mobile breath alcohol testing units, or BAT Mobiles, has been responsible for reducing late-night impaired driving to less than 1 in 100--the lowest rate ever measured in the U.S.

All 100 counties have joined the GHSP's "Click It or Ticket" and "Booze It & Lose It" campaigns by establishing county law enforcement coordinators that organize local agencies that participate in the efforts. The U.S. Department of Transportation has praised the initiative as an outstanding example for the U.S. DOT's campaign to reduce alcohol-related fatalities and increase safety belt use.

The GHSP has also begun to focus additional attention on motorcycle safety and commercial motor vehicles. Each of these two types of vehicles is high in the number of fatal crashes and serious injuries. Motorcycling has become more popular in recent years increasing the exposure of those riding to crashes. GHSP is working to address safety issues from a legislative standpoint and from an education perspective. Commercial motor vehicles are an area that GHSP is focusing primarily on education issues at this time.

A high school component of the "Click It or Ticket" campaign has been implemented. This program is named "R U Buckled?" ties safety belt usage to parking privileges at individual high schools. The program has been implemented in over 150 high schools statewide.

The GHSP operates and schedules the North Carolina Highway Safety Exposition (Expo). The award-winning Expo is a 50-foot trailer with interactive highway safety exhibits. The Expo features animated robotic characters and an impaired driving simulator. This exhibit travels across North Carolina carrying a lively highway safety message to street fairs, schools and conferences.

The following represents the GHSP plan:
